Dr. Thomas C. Nelson
Project Associate
The University of Wisconsin
College of Agriculture
Madison 6, Wisconsin

Dear Dr. Nelson:

Your letter of September 18 with regard to Furadroxyl, NF-67, and its bacterial aspects has been referred to me.

We are most happy to have this request from you and learn of your continued interest in this member of the nitrofurans. However, we operate under certain restrictions in such matters and would appreciate it if you would have your immediate Department Head signify the desirability of having this material.

Thank you for your interest and if we can be of any assistance will you kindly so inform us.

Very truly yours,

W.C. Ward

W. C. Ward
Assistant to the Research Director
